

East & Southeast Asia :: Malaysia

Introduction :: Malaysia

Background:

During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore, as well as Sabah and Sarawak on the northern coast of Borneo, joined the Federation. The first several years of the country's independence were marred by a communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's withdrawal in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies and has introduced some civil reforms.

note: adopted 1957; the full version is only performed in the presence of the king; the tune, which was adopted from a popular French melody titled "La Rosalie," was originally the anthem of the state of Perak

Economy:: Malaysia

Economy - overview:

Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, biotechnology, and services. NAJIB's Economic Transformation Program (ETP) is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. The NAJIB administration also is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Nevertheless, exports - particularly of electronics, oil and gas, palm oil and rubber - remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined with strained government finances, has forced Kuala Lumpur to begin to reduce government subsidies. The government is also trying to lessen its dependence on state oil producer Petronas. The oil and gas sector supplies about 35% of government revenue in 2011. Bank Negara Malaysia (central bank) maintains healthy foreign exchange reserves, and a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, Malaysia could be vulnerable to a fall in commodity prices or a general slowdown in global economic activity because exports are a major component of GDP. In order to attract increased investment, NAJIB has raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but he has encountered significant opposition, especially from Malay nationalists and other vested interests.

Transnational Issues:: **Malaysia**

Disputes - international:
while the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions over the Spratly Islands, it is not the legally binding "code of conduct" sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly Islands; disputes continue over deliveries of fresh water to Singapore, Singapore's land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; land and maritime negotiations with Indonesia are ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; separatist violence in Thailand's predominantly Muslim southern provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo; per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei's sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait
Refugees and internally displaced persons:
refugees (country of origin): 84,671 (Burma) (2012)
stateless persons: 40,001 (2012); note - Malaysia's stateless population consists of Rohingya refugees from Burma, ethnic Indians, and the children of Filipino and Indonesian illegal migrants; Burma stripped the Rohingya of their nationality in 1982; Filipino and Indonesian children who have not have been registered for birth certificates by their parents or who received birth certificates stamped "foreigner" are not eligible to go to government schools; these children are vulnerable to statelessness should they not be able to apply to their parents' country of origin for a passport
Trafficking in persons:

current situation: Malaysia is a destination and, to a lesser extent, a source and transit country for women and children subjected to conditions of forced labor and women and children subjected to sex trafficking; Malaysia is mainly a destination country for foreign workers who migrate willingly from countries including Indonesia, Nepal, India, Thailand, China, the Philippines, Burma, Cambodia, Laos, Bangladesh, Pakistan, and Vietnam but subsequently encounter forced labor or debt bondage at the hands of their employers in the domestic, agricultural, construction, plantation, and industrial sectors; a small number of Malaysian citizens were reportedly trafficked internally and abroad to Singapore, China, and Japan for commercial sexual exploitation; refugees are also vulnerable to trafficking; some officials are reportedly complicit in facilitating trafficking

tier rating: Tier 2 Watch List - Malaysia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has made no tangible improvements to its inadequate system for identifying and protecting trafficking victims, such as amending its laws to allow victims to reside in NGO shelters; trafficking victims identified by Malaysian authorities are forcibly detained in government facilities, where they are provided with limited, if any, access to legal or psychological assistance by the government or NGOs; increasing efforts are being made to investigate and prosecute trafficking offenders, notably in the area of labor trafficking, though convictions of sex trafficking offenders has decreased; many front-line officials continue to lack the ability to recognize indicators of human trafficking, hindering the investigation of cases and the identification of victims; although the confiscation of passports by employers is illegal, the government has not prosecuted any employers who confiscated migrants' passports or travel documents or confined them to the workplace (2013)

Illicit drugs:

drug trafficking prosecuted vigorously and carries severe penalties; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market
