

Africa :: Seychelles

Introduction :: Seychelles

Background:

A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was re-elected in 2001, but stepped down in 2004. Vice President James MICHEL took over the presidency and in July 2006 was elected to a new five-year term; he was reelected in May 2011.

Economy :: Seychelles

Economy - overview:

since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle-income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. In July 2008 the government defaulted on a Euro amortizing note worth roughly US\$80 million, leading to a downgrading of Seychelles credit rating. In an effort to obtain loans to service its debt, Seychelles in November 2008 signed a standby arrangement with the IMF that mandated floating the exchange rate, removing foreign exchange controls, cutting government spending, and tightening monetary policy. In response to Seychelles' successful implementation of these policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism and the initial effects of liberalization, but the economy recovered in 2010-11 after the reforms took hold and tourism increased. Growth slowed again in 2012 with flagging tourism from Russia and the United Arab Emirates. Seychelles is attempting to implement further structural reforms, including overhauling the tax

system, reorganizing of state enterprises, and deregulating the finance and communications sectors.

Transnational Issues :: Seychelles

Disputes - international:

Mauritius and Seychelles claim the Chagos Islands (UK-administered British Indian Ocean Territory)

Trafficking in persons:

current situation: Seychelles is a source and destination country for Seychellois children and foreign women subjected to sex trafficking; Seychellois girls and, to a lesser extent, boys are forced into prostitution in nightclubs, bars, guest houses, hotels, brothels, private homes, and on the streets by peers, family members, and pimps; foreign tourists, sailors, and migrant workers contribute to the demand for commercial sex acts in Seychelles; some of the large population of foreign migrant workers reportedly experience the underpayment of wages and substandard housing

tier rating: Tier 2 Watch List - Seychelles does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has failed to report any investigations, prosecutions, or convictions of trafficking offenses; the government also has not identified or provided protective services to any trafficking victims and punished victims for crimes committed as a result of being trafficked, although it has acknowledged the need for specialized training of officials in recognizing, investigating, and prosecuting trafficking offenses, it did not provide any such training during the reporting period (2013)
