Europe :: Hungary

Introduction :: Hungary

Background:

Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU five years later. In 2011, Hungary assumed the six-month rotating presidency of the EU for the first time.

Flag description:

three equal horizontal bands of red (top), white, and green; the flag dates to the national movement of the 18th and 19th centuries, and fuses the medieval colors of the Hungarian coat of arms with the revolutionary tricolor form of the French flag; folklore attributes virtues to the colors: red for strength, white for faithfulness, and green for hope; alternatively, the red is seen as being for the blood spilled in defense of the land, white for freedom, and green for the pasturelands that make up so much of the country

Economy:: Hungary

Economy - overview:

Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-27 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment worth more than \$70 billion. In late 2008, Hungary's impending inability to service its short-term debt - brought on by the global financial crisis - led Budapest to obtain an IMF/EU/World Bank-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in an economic contraction of 6.8% in 2009. In 2010 the new government implemented a number of changes including cutting business and personal income taxes, but imposed "crisis taxes" on financial institutions, energy and telecom companies, and retailers. The IMF/EU bail-out program lapsed at the end of the year and was replaced by Post Program Monitoring and Article IV Consultations on overall economic and fiscal processes. The economy began to recover in 2010 with a big boost from exports, especially to Germany, and achieved growth of approximately 1.7% in 2011. At the end of 2011 the government turned to the IMF and the EU to obtain financial backstop to support its efforts to refinance foreign currency debt and bond obligations in 2012 and beyond, but Budapest's rejection of EU and IMF economic policy recommendations led to a breakdown in talks with the lenders in late 2012. Since joining the EU in 2004, Hungary has been subject to the European Commission's Excessive Deficit

Procedure; Brussels has requested that the government outline measures to sustainably reduce the budget deficit to under 3% of GDP. Ongoing economic weakness in Western Europe as well as lack of domestic investment and demand caused a GDP to fall 1.7% in 2012. Unemployment remained high, at more than 11%.
