

Central America and Caribbean :: Saint Kitts and Nevis

Introduction :: Saint Kitts and Nevis

Background:

Carib Indians occupied the islands of the West Indies for hundreds of years before the British began settlement in 1623. In 1967, the island territory of Saint Christopher-Nevis-Anguilla became an associated state of the UK with full internal autonomy. The island of Anguilla rebelled and was allowed to secede in 1971. The remaining islands achieved independence in 1983 as Saint Kitts and Nevis. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed. Nevis continues in its efforts to separate from Saint Kitts.

Economy :: Saint Kitts and Nevis**Economy - overview:**

The economy of Saint Kitts and Nevis depends on tourism; since the 1970s tourism has replaced sugar as the traditional mainstay of the economy. Following the 2005 harvest, the government closed the sugar industry, after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in 2009-2012, and the economy has not yet returned to growth. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand. Furthermore, the government is constrained by one of the world's highest public debt burdens - equivalent to roughly 140% of GDP in 2012 - largely attributable to public enterprise losses.
