Introduction :: Chad

Background:

Chad, part of France's African holdings until 1960, endured three decades of civil warfare, as well as invasions by Libya, before a semblance of peace was finally restored in 1990. The government eventually drafted a democratic constitution and held flawed presidential elections in 1996 and 2001. In 1998, a rebellion broke out in northern Chad, which has sporadically flared up despite several peace agreements between the government and the insurgents. In 2005, new rebel groups emerged in western Sudan and made probing attacks into eastern Chad despite signing peace agreements in December 2006 and October 2007. In June 2005, President Idriss DEBY held a referendum successfully removing constitutional term limits and won another controversial election in 2006. Sporadic rebel campaigns continued throughout 2006 and 2007. The capital experienced a significant insurrection in early 2008, but has had no significant rebel threats since then, in part due to Chad's 2010 rapprochement with Sudan, which previously used Chadian rebels as proxies. DEBY in 2011 was reelected to his fourth term in an election that international observers described as proceeding without incident. Power remains in the hands of an ethnic minority.

Economy :: Chad

Economy - overview:

Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil sector that began in 2000. Economic conditions have been positive in recent years, with real GDP growth reaching 13% in 2010 because of high international prices for oil and a strong local harvest. GDP growth for 2012 was 5%. However, Chad's investment climate remains challenging due to limited infrastructure, a lack of trained workers, extensive government bureaucracy, and corruption. At least 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood. The government of Chad is determined to improve agricultural production through modernization and mechanization over the next three years, and hosted a national Rural Development Forum in 2012 to promote investment in agriculture. Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. Remittances are also an important source of income. The Libyan conflict disrupted inflows of remittances to Chad's impoverished western region that relies on income from Chadians living in Libya. A consortium led by two US companies has been investing \$3.7

billion to develop oil reserves - estimated at 1.5 billion barrels - in southern Chad. Chinese companies are also expanding exploration efforts and have completed a 311-km pipeline and the country's first refinery. The nation's total oil reserves are estimated at 1.5 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

Transnational Issues :: Chad

Disputes - international:

since 2003, ad hoc armed militia groups and the Sudanese military have driven hundreds of thousands of Darfur residents into Chad; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force with Sudan, which has helped to reduce cross-border banditry and violence; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons:

refugees (country of origin): 306,960 (Sudan) (2012); 83,751 (Central African Republic) (2013)

IDPs: 90,000 (majority are in the east) (2012)

Trafficking in persons:

current situation: Chad is a source, transit, and destination country for children subjected to forced labor and sex trafficking; the trafficking problem is mainly internal and frequently involves family members entrusting children to relatives or intermediaries in return for promises of education, apprenticeships, goods, or money; child trafficking victims are subjected to involuntary domestic servitude, forced cattle herding, forced begging, involuntary agricultural labor, or commercial sexual exploitation; some Chadian girls who travel to larger towns in search of work are forced into prostitution; in 2012, Chadian children were identified in some government military training centers and among rebel groups

tier rating: Tier 2 Watch List - Chad does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government has made a limited commitment to increased anti-trafficking law enforcement but continues to lack formal victim identification procedures; draft revisions to Chad's penal code that would prohibit child trafficking and provide protection for victims were not enacted for the third consecutive year; the government continues its nationwide campaign on human rights issues, including human trafficking, and high-ranking officials, such as the president and prime minister, are speaking out publicly against human trafficking (2013)
